

Job Title: Senior Backend Engineer
Company: CloudScale Technologies Inc.
Location: Remote (US / Canada)
Employment Type: Full-Time

About CloudScale Technologies:

CloudScale Technologies is a fast-growing cloud infrastructure provider building next-generation developer tooling and distributed microservices.

Role Overview:

We are looking for an experienced Senior Backend Engineer to design, build, and maintain our high-throughput REST APIs and data processing services. You will work closely with frontend teams and infrastructure engineers to build resilient, scalable backend platforms.

Key Responsibilities:

- Design, develop, and deploy scalable RESTful APIs using Python and FastAPI.
- Model and optimize relational database schemas and queries in PostgreSQL.
- Containerize backend services using Docker and manage deployments in cloud environments.
- Implement robust unit and integration testing pipelines with automated CI/CD workflows.
- Collaborate with frontend engineers to integrate API contracts smoothly.
- Mentor junior and mid-level engineers through code reviews and technical design discussions.

Required Skills:

- Python
- FastAPI
- PostgreSQL
- Docker
- REST APIs
- Git

Preferred Skills:

- AWS (Amazon Web Services)
- Redis
- React
- Kubernetes
- Microservices Architecture

Qualifications:

- Bachelor's degree in Computer Science, Software Engineering, or equivalent practical experience.
- 4+ years of professional backend software development experience.
- Strong understanding of database design, API security, and distributed systems.
