

Alex Mercer

San Francisco, CA | alex.mercer@email.com | (555) 234-5678 | github.com/alexmercer

PROFESSIONAL SUMMARY

Senior Full Stack & Backend Engineer with 5+ years of experience designing and scaling distributed systems, REST APIs, and modern cloud applications. Proven track record of improving system reliability and reducing latency.

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, TypeScript, SQL
- Frameworks & Libraries: FastAPI, React, Node.js, Express
- Databases: PostgreSQL, Redis, MongoDB
- Cloud & DevOps: Docker, AWS (ECS, S3, RDS), Git, GitHub Actions, Linux
- Architecture & Patterns: Microservices Architecture, REST APIs, CI/CD, Agile

PROFESSIONAL EXPERIENCE

Lead Backend Engineer | Apex Cloud Systems | 2022 - Present

- Architected and built high-performance microservices using FastAPI and PostgreSQL handling 10M+ daily requests.
- Containerized multi-service platform using Docker and orchestrated deployments on AWS.
- Integrated Redis caching layers, reducing database query latency by 45%.
- Established automated testing suites with pytest, boosting test coverage to 92%.

Software Engineer | DevWorks Studio | 2020 - 2022

- Developed responsive web interfaces using React and TypeScript.
- Implemented core RESTful API endpoints using Python and PostgreSQL.
- Collaborated with product teams in an agile environment and managed version control via Git.

KEY PROJECTS

AI Recruitment Assistant Platform

- Built an automated candidate screening and resume parsing engine using FastAPI and Groq LLM.
- Containerized the full application stack with Docker for reproducible local and cloud deployment.

Distributed Task Queue

- Implemented a reliable asynchronous task queue in Python with Redis backend for distributed background processing.

EDUCATION

Bachelor of Science in Computer Science | University of California, Berkeley (2016 - 2020)
